

## **Prasco Launches the Authorized Generic of ADVAIR DISKUS (fluticasone propionate and salmeterol inhalation powder)**

Prasco Laboratories announced today the launch of the Authorized Generic of ADVAIR DISKUS (fluticasone propionate and salmeterol inhalation powder). This is the latest prescription medication in Prasco's line of Authorized Generics in partnership with GSK. Under the terms of the agreement, all three strengths of fluticasone propionate and salmeterol inhalation powder, 100/50, 250/50 and 500/50 mcg using the DISKUS inhaler will be distributed in the U.S. under the Prasco label.

This launch marks the first time a generic version of ADVAIR DISKUS (fluticasone propionate and salmeterol inhalation powder) is available in the United States. "We are pleased to provide millions of patients the trusted brand of ADVAIR DISKUS as an authorized generic," said Prasco Chief Executive Officer Chris Arington. "The Prasco authorized generic, fluticasone propionate and salmeterol inhalation powder will provide patients with the same quality and experience as the brand product. A unique and exciting part of this launch is that the DISKUS inhaler itself will also be identical," stated Arington. "We are grateful to expand our relationship with a leader in the industry like GSK."

GSK and DISKUS are registered trademarks of the GSK group of companies.

# COMING SOON

The Authorized Generic of  
**ADVAIR DISKUS (fluticasone propionate and salmeterol inhalation powder)**

Prasco is now offering the Authorized Generic of ADVAIR DISKUS, a GSK product. Prasco's Authorized Generic is the exact same medicine and inhaler as ADVAIR DISKUS but with a Prasco label. For more information about the product, please read below:
